Instructor Upload Guide

Submission Deadlines and Upload Location

1. Please submit the course documents for Semester I, AY2025, to myCourseville by **15 June 2026**.
2. Please submit the course documents for Semester II, AY2025, to myCourseville by **15 June 2026**.
3. Files must be uploaded to **myCourseville** (the faculty LMS) by the applicable deadline.
4. Submit using this folder/file naming format:

- The template folder you download from myCourseville is already named correctly for your course.
- Do not rename the folder or zip filename before upload.
- `2145211-Introduction-to-Aerospace-Engineering`
- Format rule: `course-id-course-name` separated by hyphens.

Questions / Contact

For questions, email:

- `iseabet2023@gmail.com`

and cc both:

- `joshua.s@chula.ac.th`
- `aung.p@chula.ac.th`

Your job:

1. Download your course template zip from myCourseville (the folder/file provided by the coordinator in your course space).
2. Extract the zip locally.
3. Open the extracted course folder.
4. Fill out `00-meta/instructor_course_identity_template.csv`.
5. Fill out `03-schedule/instructor_course_schedule_template.csv` (week + topic only).
6. Fill out `01-syllabus/instructor_syllabus_abet_reference.csv`.
7. Fill out `90-grades/instructor_course_grading_template.csv` (grading components + percentages).
8. Replace placeholder PDFs with your own files.
9. Do not edit `00-meta/course-meta.tex` (this will be generated from your CSV).
10. Do not edit `03-schedule/course-schedule.tex` (this will be generated from your CSV).
11. Do not edit `01-syllabus/syllabus-abet.tex` (this will be generated from your CSV data).

12. Do not edit `90-grades/course-grading.tex` (this will be generated from your CSV data).
13. Delete placeholder files that are not used.
14. Keep the same folder names and filename patterns.
15. Re-zip the same course folder.
16. Upload the zipped course file back to myCourseville and replace the existing file.

Global Rules

1. Do not rename folders.
2. Do not rename `.tex` files.
3. Use PDF files for evidence documents.
4. Keep 2-digit numbering (`01`, `02`, `03`, ...).
5. Replace placeholders; do not add random filenames like `week 3 final slides.pdf`.

Folder-by-Folder Instructions

`00-meta`

Files: - `instructor_course_identity_template.csv` - `course-meta.tex`

Action:

1. Fill out `instructor_course_identity_template.csv` with your course identity information.
2. Do not rename the CSV file.
3. Do not edit `course-meta.tex`; it will be generated by the program from your CSV data.

`01-syllabus`

- `instructor_syllabus_abet_reference.csv`
- `syllabus-abet.tex`
- `syllabus-instructor.pdf`

Action:

1. Fill out `instructor_syllabus_abet_reference.csv`.
2. Do not rename the CSV file or column headers.
3. Do not edit `syllabus-abet.tex`; it will be generated from the CSV data.
4. Replace `syllabus-instructor.pdf` with the instructor syllabus PDF. This does not need to be reformatted from what you currently give students.

How to fill `instructor_syllabus_abet_reference.csv`:

1. Keep the first row (header) exactly as-is.
2. Use the first data row for core course information:

- course_code
- course_name
- required_or_elective
- catalog_description
- prerequisites
- categorization_of_credits
- instructors
- class_laboratory_schedule
- prepared_by
- prepared_date
  - For courses with co-requisites, include them in the prerequisites field using this format:
  - Prerequisite: XXX; Co-requisite: YYY
  - If none, enter None.

3. Use the list columns for content lines:

- textbooks_and_other_required_material
- course_learning_outcomes_expected_performance_criteria
- topics_covered

4. For multiple list entries, use continuation rows:

- Row 1: fill main course fields and first list item(s).
- Next rows: leave core fields blank and add additional textbook/CLO/topic lines.

5. Keep numbering style in list text:

- 1) ...
- 2) ...
- 3) ...

6. Outcome mapping columns are:

- ice_outcome_1 through ice_outcome_7

7. Map CLOs to the 7 program SOs using these definitions:

- ice_outcome_1: an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- ice_outcome_2: an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- ice_outcome_3: an ability to communicate effectively with a range of audiences.
- ice_outcome_4: an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which

must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- `ice_outcome_5`: an ability to function effectively on a team whose members together provide leadership, create a collaborative environment, establish goals, plan tasks, and meet objectives.
- `ice_outcome_6`: an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- `ice_outcome_7`: an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

8. You do **not** need to map CLOs to all 7 outcomes for every course. Only fill outcomes that are actually assessed in your course; leave non-assessed outcomes blank.
9. For each outcome column you use, follow this pattern:

- `CLO1=W` / `CLO2=M` / `CLO3=S` / `CLO4=` (blank if not mapped)
- Optional final mapping note row using `Comments=...`

10. Use `S`, `M`, `W` exactly for mapping strength. S=Strong, M=Medium, W=Weak.
11. Do not insert/delete/reorder columns.
12. If a value is unknown, leave it blank rather than changing column names.

`02-textbook`

Current example files: - `textbook-part01.pdf` - `textbook-part02.pdf` - `textbook-part03.pdf`

Action:

1. We only need a screenshot of the textbook cover for each textbook used.
2. If you use one textbook, submit one file as `textbook-part01.pdf` and delete unused textbook placeholders.
3. If you use multiple textbooks, submit one file per textbook and number sequentially: `textbook-part01.pdf`, `textbook-part02.pdf`, `textbook-part03.pdf`, and continue as needed.

`03-schedule`

Files: - `instructor_course_schedule_template.csv` - `course-schedule.tex`

Action:

1. Fill out `instructor_course_schedule_template.csv`.
2. Only fill in:

- `week` (numeric week number)
- `topic` (topic covered that week)

3. One row per week.
4. Leave blank rows unused.
5. Do not edit `course-schedule.tex`; it will be generated by the program from your CSV data.

`10-lectures`

If you only have a single part for a given week, use: - `weekNN-part01.pdf`

If you need additional parts for a week, add: - `week10-part02.pdf`, `week10-part03.pdf`, etc.

Current example files include: - `week01-part01.pdf`, `week01-part02.pdf`, `week01-part03.pdf` - `week02-part01.pdf`, `week02-part02.pdf`, `week02-part03.pdf` - `week03-part01.pdf` through `week17-part01.pdf`

Naming rule: - `weekNN-partMM.pdf` - `NN` = week number with 2 digits - `MM` = part number with 2 digits

Examples: - `week03-part01.pdf` - `week03-part02.pdf` - `week10-part01.pdf`

`20-assignments`

Current files: - `asg-all-scores.pdf` - For each assignment example (`01` to `05`): `asgNN-instructions.pdf` `asgNN-high.pdf` `asgNN-average.pdf` `asgNN-low.pdf` `asgNN-scores.pdf`

Action:

1. Replace example files with your real files.
2. You do not need to submit every assignment given in the semester; submit representative assignments that reflect how CLOs are assessed.
3. For `...-low.pdf`, use a low-performing submission that still contains substantive student work (do not use zero-score or blank/non-submitted work).
4. If you have more than 5 assignments, continue numbering: `asg06-instructions.pdf`, `asg06-high.pdf`, etc.

Meaning of each suffix: - `asg-all-scores`: assignment scoresheet containing scores for all assignments. You can remove this if you include individual assignment scores. - `instructions`: assignment statement and solution and rubric for grading - `high`: high-performing sample - `average`: average-performing sample - `low`: low-performing sample - `scores`: assignment scores for the entire class on each assignment

`30-quizzes`

Current files: - `quiz-all-scores.pdf` - For quiz examples (`01` to `05`): `quizNN-instructions.pdf` `quizNN-high.pdf` `quizNN-average.pdf` `quizNN-low.pdf` `quizNN-scores.pdf`

Action:

1. Replace example files with your real files.
2. If you have more than 5 quizzes, continue numbering: `quiz06-instructions.pdf`, `quiz06-high.pdf`, etc.

Meaning of each suffix: - `quiz-all-scores`: quiz scoresheet containing scores for all quizzes. You can remove this if you include individual quiz scores. - `instructions`: quiz statement/solution/rubric for grading - `high`: high-performing sample - `average`: average-performing sample - `low`: low-performing sample - `scores`: quiz scores for the entire class on each quiz

`40-exams`

Midterm set: - `midterm-instructions.pdf` - `midterm-high.pdf` - `midterm-average.pdf` - `midterm-low.pdf` - `midterm-scores.pdf`

Final set: - `final-instructions.pdf` - `final-high.pdf` - `final-average.pdf` - `final-low.pdf` - `final-scores.pdf`

Action:

1. Replace each placeholder with real exam evidence.
2. Keep these exact filenames.
3. If you don't have a midterm or a final exam then just delete the placeholder files.

`90-grades`

- `instructor_course_grading_template.csv`
- `course-grading.tex`
- `overall-grades.pdf`

Action:

1. Fill out `instructor_course_grading_template.csv`.
2. Use columns:

- `component` (e.g., Labs, Quizzes, Projects, Final Exam)
- `weight_percent` (numeric percent only, no `%` symbol)

3. One grading item per row.
4. Keep the CSV header unchanged.
5. Do not edit `course-grading.tex`; it will be generated from your CSV data.
6. Do not edit or replace `overall-grades.pdf`; it is generated by the program.

What To Return

1. Keep one top-level course folder with the same internal structure.

2. Zip that folder.
3. Send the zip back and replace the file on myCourseville with your updated file.

Final Self-Check Before Sending

1. All files are in the correct folders.
2. Filenames follow the exact patterns above.
3. No ad hoc filenames remain.
4. All placeholder PDFs you intended to replace are replaced.
5. All unused placeholder PDFs have been deleted.
